** ARGENTINA [non]. 9455, Fri Apr 24 at 2302, RAE via WRMI in Portuguese, with dx.com.ar DX program, info compiled by Arnaldo Slaen for ``current month of November 2022`` !!! - my translation, so admittedly 3.5-year-old DX OLDS! Why in the world are they broadcasting such a disservice?! I don`t even bother to copy any further (Glenn Hauser, OK, WOR)

** BRAZIL. 15145 RNA back on air circa 21 UT Apr 23 after missing Apr 21 and 22 (Glenn Hauser, OK, WORLD OF RADIO 2344)

** BRAZIL. 15145, Apr 23 at 2024, S7 music // 11780, so RNA is back after missing a few days from this new frequency, as I mention on WOR 2344; but by 2145 it had shifted to 15150, per Ron Howard, and stayed there until 0201*. They better not use it when WMLK is on our mornings.

By 0750 Apr 24 I happen to awaken so check for token English, indeed on 6180 and weaker 11780 but nothing on 15145 or 15150, about a musician/composer born on April 23. At 1050 I am awake again, when there is heavy QRM but seems still Brasuguese; 1050 was originally reported as another English/Spanish repeat time (Glenn Hauser, OK, WOR)

** BRAZIL. 15190 -219 Hz = 15187.81 kHz, Apr 26 at 0052, Rádio Inconfidência S5/S6 measured into Bonaire, since I came up with nothing from Brasil on 15140 or 15145 (Glenn Hauser, OK, WOR)

** BRAZIL. 28485 USB, Apr 29 at 2222, PU1SHK, Matt in Rio calling CQDX. Have heard him before. QRZ.com: ``PU1SHK Brazil flag Brazil, Matheus "Matt" Miller, Campos Dos Goytacazes, RJ, Brazil`` - with photos nothing but antennas. A bit earlier at 2200, 10m seemed to be dead as well as 12 and 15 (Glenn Hauser, OK, WOR)

** CANADA [non] MONACO [non]. 1467 kHz, Apr 24 at 2324 Pop Shoppe Radio special, S6/S8 into EA8DF remote at Fuerteventura, Canary Islands, playing song ``American Woman`` which would seem off-topic? There is a lite het on the plus side while I am default-tuned in USB, less than 1 kHz. Not there on LSB, and much stronger reading in AM mode, S9+10. 2331 program ID; 2341, ``15 before top of hour``; inviting reception reports. 2354.5 ``shortwave radiogram`` beepery - shouldn`t that be mediumwave?? By 0007 Apr 25 check, 1467 is off. This is on the 1000 kW transmitter at Roumoules, FRANCE; I`m sure we all wonder what a megawatthour of airtime costs, but probably confidential. Or not! Tony Pavick says, ``I would love to do it again, but at €430, unless I win the lottery it is a bit out of the question apart from the occasional use perhaps once or twice a year.``

MWoffsets indicates the het plus is likely IRAN:

** CANADA [non]. Tony Pavick, BC, replies to my 1467 kHz log: ``Yes -- the het was in fact Iran. As to the choice of playing American Woman by the Guess Who, it was a two fold purpose. First was the fact that it is Canadian talent. Second, however, was a "nose tweak" to the bashing that both Europe and Canada get from the occupant of the oval office in social media posts. A way of saying that Canada stands with Europe against such taunting. Tony Pavick`` (Glenn Hauser, OK, WOR)

** HAWAII [and non]. 15000, Apr 27 at 2245, I hurriedly picked the wrong NZ remote, but WWVH was saying something JBA at 2245 when propagation info had been airing; need further chex also of WWV, following this from Joe Hanlon, NJ:

``Have you noticed this? The propagation reports that are usually heard at 18 minutes past the hour on WWV are silent! Has this service ended without notice? Maybe it was eliminated for budget reasons, or something else? If anything, we as SWLers/DXers who depend on this service, which was updated every 3 hours, should write to NIST and request that it be restored. Having current propagation and solar flux info would be useful for us. Btw, I noted the omission of the propagation reports at 1918 UT, and again at 2018, on 15 and 20 MHz, April 27. --Joe``.

Indeed, at 0018 UT Apr 28, nothing but tix on 10000 WWV. Further chex still missing, but: At 0145 WWVH 15000 best via KFS *NW* antenna: Still propping! For Apr 27: SF 142, A 7, K at 00, 1.00, past minor R1, next moderate R2.

10000, by 1518 UT Apr 28, WWV direct has resumed the propagation info. If we had tone instead of tix only during this minute, it would be a bad omen of the prop report really deliberately canceled. Mike Cooper and Ron Howard also received a reply from NIST/WWV that there had been a ``system malfunxion`` (Glenn Hauser, OK, WOR)

** MADAGASCAR. 11825, Apr 27 at 0436, English talk about particles, S7/S9. It`s African Pathways Radio on MWV at 295 degrees so also good for us (Glenn Hauser, OK, WOR)

** MALI. 5995, Apr 23 at 0629, no signal again from ORTM.

Also from Ron Howard: ``The situation in Mali and Bamako seems to be very bad, per this travel advisory -

https://travel.gc.ca/destinations/mali
Last updated: April 20, 2026 10:23 ET:

Avoid all travel to Mali due to the threat of terrorism, kidnapping, banditry and fuel shortages. If the security situation in Mali deteriorates, the ability of the Embassy of Canada to Mali, in Bamako, to provide consular services may be limited.

Security situation and fuel shortages: The security situation remains unpredictable and could deteriorate further. Since September 2025, terrorist groups have intensified their attacks, targeting fuel tankers and setting up roadblocks on
major supply routes. This blockade has led to severe fuel shortages, causing a reduction in essential services, long lines at gas stations and transportation difficulties.

The entire country, including Bamako, remains vulnerable to terrorist threats and the risk of kidnapping.

Shortages – Power outages occur regularly across the country and can last more than 8 hours. Not all buildings have generators. Power outages could impact essential services, such as: the public water supply, telecommunications, banking transactions.

A state of emergency is currently in effect throughout Mali. Heightened security measures are in place, including random identity checks and roadblocks. Carry identification and follow the instructions of local authorities at all times.``

``Manuel Méndez, Lugo, Spain: Thank you very much Ron, checked today 23-04, 0545-0625, out of the air`` (Glenn Hauser, OK, WORLD OF RADIO 2344)

** OKLAHOMA. 95.5, Apr 28 circa 1930 UT when in vicinity of S Cleveland and W Owen K Garriott in Enid, on caradio, rock music with $tereo pilot from never IDed pirate/part 15 transmitter, range only a few blox, beyond which I was getting full-power KECO Elk City OK. 95.5 is also a strange choice as we have a local on 95.7 (Glenn Hauser, Enid, WOR)

** OKLAHOMA. Early UT Friday April 24 we were watching tornado reports in adjacent counties to the north, Grant and Kay, but by 0100 UT another tornado area was approaching Enid. The major OKC TV stations were on it continuously. NOAA Weather Radio - NWR Enid station on ``ch 4``, WXL48, 162.475 MHz was already knocked off the air = no signal into our C Crane Skywave SSB2, still off the next morning, https://www.weather.gov/nwr/outages

but must have come back on circa 15 UT. While it was off there was dead air on ``ch 5``, not sure where that is.

I was too busy getting WORLD OF RADIO finished and dispatched, and keeping up with tornado warnings, to survey storm coverage on FM stations relaying different OKC TV stations, as I did during a previous outbreak not threatening us.

The tornado path was on the south/SE side of Enid, while we are in the NW quadrant. We did descend to our storm cellar for a while just in case. Thanks to everyone who inquired if we are OK. Some 40 homes in a neighborhood just east of Vance AFB were demolished, as you may have seen on national news coverage, but there were no fatalities. After a respite Saturday, more of this is expected Sunday (Glenn Hauser, Enid, WOR)

** ROMANIA [and non]. 11740, Apr 27 at 0501, S9/+25 of news about Romania in French, RRI Galbeni at 0500-0530, 300 kW, 285 degrees.

RFI/TDF/ISS also in French on 11700 is much weaker; three-hour span on three different azimuths per HFCC: 0400-0700 on 130/155/200 degrees (Glenn Hauser, OK, WOR)

** SPAIN. 15500, Fri Apr 24 at 2021, REE in Arabic, to North America! Also 15520 to ME where it might be more useful (Glenn Hauser, OK, WOR)

** SPAIN. 15500, 15520, 17715, Mon Apr 27 at 2206, absolutely lovely music on REE, apparently Sephardic per announcement at 2209. 17715 for SAm is axually stronger direct, S9+20/30 than 15500 for NAm, S9+10/20, but 15500 preferable with less fading. Also for ME 15520 which pales only by comparison. Sked shows `España es música` with Marcos Mostaza, but only occasional episodes may be heard from archive. All times for this, not all during SW hours, are: ``Lunes 13.04 y 22.00 UTC. Martes 07.04 y 17.30 UTC. Jueves las 16.30 UTC. Viernes a las 01.00 UTC. Domingo 02.04 y 12.30 horas UTC. Somos música, somos raíces, somos gente y somos ritmo.`` (Glenn Hauser, OK, WOR)

** SPAIN. 17715, Apr 28 at 2200, S8/S9 of dead air direct in token French on Tuesday from REE; while 15500 & 15520 are modulating normally. 17715 remains DA at 2208, 2222, and also into Bonaire S7/9+10 at 2337. Someone`s nonawake at Noblejas. It`s really incredible how many SW stations let this happen - they don`t care enough to monitor themselves constantly, not even by silence-sensor alarms!

JRX in Paraíba already reported earlier: ``17715. Tue, April 28, 2026. 1901-1920, Radio Exterior de España, Noblejas-E, in Spanish to SAm. Very good signal, S9 +30, dead air, zero modulation! Since 1829 UT when I tuned for the first time! Parallel on 15390nob, out; 15500nob, woman and men announcers hablando de fútbol, 45543; 15520nob, 3~45543``

And later, 17715 still DA April 29, as Wolfgang Büschel reports: ``REE Madrid, live coverage, football game tonight from 19-21 UT Atlético Madrid vv Arsenal London England. At 2005 UT on 15500 S=9+10dB in Europe, 15520 kHz S=9+35dB much powerful signal, and 17715.014 kHz EMPTY CARRIER noted at S=9+25dB signal level at 2009 UT, no football game live transmission audio. 15390 alternate frq channel - empty`` (Glenn Hauser, OK, WOR)

** SPAIN. 17715, April 29 at 2157, REE still dead air at S9+20/30 direct, while 15500 is VG and also 15520 manage to modulate, wrapping up coverage of stupid ballgame, 2200 timesignal and usual PSA about voting by mail before May 17 in Andalucía; 2201 opening token English since it`s Wednesday, ``live`` [not], usual pair Alba and Daniel with his especially heavy accent which is tiring to listen to even if comprehensible. They talk at breakneck pace with only one hour a week, perhaps to flaunt their fluency. Preview topics, a rugby legend, living with HIV, historic blackout a year ago in Spain & Portugal; 2203 news leads with crisis in housing prices. I`m exhausted already, hi. 2213 check now about Wash hotel shooting (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 11785.006+, Apr 24 at 2200, VOT English not off the air, S9+25 into UTwente. May I recommend this!:

https://www.pbs.org/wnet/gperf/now-hear-this-the-call-of-istanbul-about/17630/

``Now Hear This | The Call of Istanbul #5305

** TURKEY. 7275.018, Apr 26 at 0340, VOT not off the air, but S9+10/30 into UTwente, this final repeat of English, which was missing at 2200 Apr 25 from 11785, and not on 9875 either, the 2030 English frequency which sometimes stays on past 2200 as operator dozes. But for the rest of this hour on 7275, nothing but music and promo fillers: 0340 ``always-by-your-side``, 0344 TRTVOTVorld.com news, 0347 ``with-you-every-hour``. 0353 s/off the 1230 on 17620, but now they admit that some may be listening to a later repeat, but no details. 0354.7 IS starts, still going at 0358 with IDs in Malay! ``Suara ---``. 0400 timesignal and s/on Malay service, which is supposed to be on 17720! unchecked, nor do I follow how long the wrong frequency last.

I first checked at 0340 the other 0300 English frequency, 6165 which is now for S/SE Asia: much weaker into UTwente, S8/9+5 with RTTYditty on minus side about 6163, an INTRUDER, utility into broadcast band, which also bothers 6160 SW Radio Gold, Germany on its other side.

Note: 7275 is also an INTRUDER, into the North American hamband! VOT could have found a frequency above 7300 which would also be intruding

into a fixed band, but already inhabited by USA broadcast stations, so must be OK. BTW one reference I cannot find in the final WRTH 2026 book is a table of frequency allocations (Glenn Hauser, OK, WOR)

** TURKEY. 11660.003+, Sun Apr 26 at 1639, VOT S9+20/30 into UTwente as `Letterbox` starts immediately following news. Cemre says it`s a quiet afternoon, sun is out, and a fresh pot of chai is brewing somewhere in the building. Last week on 23 April, National Sovereignty and Children`s Day hosted hundreds of kids at TRT, with balloons, etc., would make nice QSL design. 1) another child in Spain, 11-year-old and champion of some DX contest, Eric --- in Zaragoza, 2 emails from him, one on Italian, other on German. Wants new QSLs and also old ones from archive to see designs; and stamps. Again VOT is quite impressed with this youngster.

2) Mr Miyaki, Hiroshima, Japan, heard Chinese, and is now graduating. Found 2013 picture of him in TRT archive. 3) Mr. --?, W Bengal, of a DX club. 4) Mr David Ansell, Sussex, listens on an old FRG. 5) Siddartha Papajarjee, W Bengal, is World Homeópathy Day celebrated in Turkey, April 10? apparently not but about homeopathic medicine. 6) Mr Nakamura, Kyoto, Japan, 55555 SINPO on 9660. 1657 that is all, 1658 ``may your batteries never die`` and theme.

1659 immediately to English schedule presented exactly thus, by target area with repetitions; time order would be more user-friendly:

Asia: 6165 at 03, 11660 at 1630, 9875 at 2030.
Iraq/Syria/Jordan/Arabia: 6165 at 03 {what about Israel??}.
Americas: 7275 at 03, 11785 at 22.
Europe: 7275 at 03, 17620 at 1230, 9750 at 1830, 11785 at 22.
Australia: 9875 at 2030.
1700 into `Geoeconomix Diary` (Glenn Hauser, OK, WOR)

** TURKEY. Re: ``7275.018, I first checked at 0340... Which is now for S/SE Asia --- I think should read S/SW Asia. 73s Zenon João Teles``

Correct, HFCC CIRAF target zones for VOT English are 38E,39,40W = Egypt, entire Arabian peninsula, Iraq, Israel, Jordan, Lebanon and Turkey itself, and Iran (Glenn Hauser, OK, WOR)

** TURKEY. 11785, April 27 at 2157, no signal yet direct from VOT English; not rehecked until 2213 when on with multi-lingual ID filler reel, S9+10/20 but splash from 11780, while 11790, 11795 and 11800 are begging to be occupied by any signal at all in the clear (Glenn Hauser, OK, WOR)

** TURKEY. 11785, Apr 28 at 2157, VOT not off the air with IS, splash from 11780 Brasil, HSNL and S9+10 direct, 2200 opening English, too poor to keep listening. Still refuses to shift even another 5 kHz away from RNA to 11790 (Glenn Hauser, OK, WOR)

** TURKEY [non]. 11785, Apr 29 at 2157, 2159, 2208, 2210 chex, no signal from VOT English direct, nor on 9875. Into UTwente at 2239, still no 11785, algo on 9875 but JBA too weak for VOT, vs ACI from 9880 which is CRI Esperanto via Kashgar, EAST TURKISTAN, for S America. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2344 monitoring: confirmed Friday April 24 at 2200 on WRMI 9955, S9+10/15 into Bonaire where it`s aimed.

Also confirmed Friday April 24 at 2231 the 2230 on SW Radio Gold, Germany, 3975.001+, S9+5 into UTwente.

Also confirmed UT Saturday April 25 at 0300 on WTWW 5085, which was on the air as early as 0130, while it has been missing last nights, for a

week? At 0258 `Ancient Word Radio` with `Truth 2 Ponder` wrapping up, S9/+10 into NH SDR; 0259 ID for 100 kW each on 9475 & 5085, altho day frequency 9475 has not been on air for months. 0300 rough start for WOR 2344 as ``the ministry of...`` and WOR opening twice. Then all seems OK, but I recheck at 0320 just as there is an overlap and WOR *starts over* from the beginning. Now it`s S9+50 direct and can barely detect the parasitic spurs plus/minus 12.9 kHz on 5072.1 and 5097.9. Fortunately they keep it going until completed at 0350 ID, minute of silence and off at 0351*

Also confirmed Saturday April 25 at 1455 the 1430 on SW Radio Gold, Germany, 6160.013-, S9/+5 into UTwente. Next week this airing expected to be pre-empted by TRSW.

** U S A [and non]. WORLD OF RADIO 2344 monitoring: confirmed Saturday April 25 at 1600 on WRN via WRMI 9395, S9+20 into Georgia SDR.

Also confirmed Saturday April 25 at 1600 on WRN via WRMI 7730: Georgia not getting it, but audible at Melbourne FL SDR, groundwave? with local QRM.

Also confirmed Saturday April 25 at 1930 on SW Radio Gold, Germany, 6160.001+, S9/+15 and 3975.001, S9+5/10 into UTwente.

Also confirmed Saturday April 25 at 1930 on WRN via WRMI 9395,

S9+10/15 into Georgia SDR.

Not confirmed Saturday April 25 the 1930v on WA0RCR, 1860 AM, MO, JBA in HNL, can`t be sure it`s my voice in following semihour but likely.

Confirmed Saturday April 25 at 2007 on WRN Europe stream.

Also confirmed Saturday April 25 at 2100 on WRMI 9395 S9+20/27 into Georgia SDR.

Also confirmed Saturday April 25 at 2230 on WRMI 17790, S7/9 into Bonaire SDR.

Also confirmed Saturday April 25 at 2230 on WRMI 15770, S9/+10 into Maryland SDR.

Also confirmed Saturday April 25 at 2330 on IPAR/NEXUS webcast, interrupting a previous show on sked as United Nations News. So IRRS does have WOR 2344 despite not airing it on 1323 Friday.

Also confirmed UT Sunday April 26 from 0331 the 0315v on WA0RCR, 1860 AM, MO, S9+5/15 into Peoria SDR, better than closer ones. But lots of storm crashes.

Also confirmed Sunday April 26 at 0637 the 0630 on WRN via WRMI, 5850 S9+20, 7730 S5/S6 JBA, and 7780 S9+5. Otherwise: 5950 off, 7570 music, 9395 SMTV, 15770 inaudible.

Missed checking 0930 on 9510, 1030 on 9395, 7780; anyone?

Confirmed Sunday April 26 at 1900 on IRRS SW via AM Italia, 1322.995, S9 into UTwente; S9+5/10 into nearby Noale SDR; still inactive on 918, 207 kHz. Next:

** U S A [and non]. WORLD OF RADIO 2344 monitoring: confirmed Sunday April 26 at 2000 on IRRS SW via AM Italia, 1322.995, S9+10 into nearby Noale SDR.

Also confirmed Sunday April 26 at 2000 on WRN Europe stream.

Also confirmed Sunday April 26 at 2155 the 2130 on SW Radio Gold, Germany, 3975.001+ S9+5/10 and 6160.001+ S9 with RTTYditty from plus side unless bandwidth <7 kHz, both into UTwente. Then 2159 s/off of 6160 only.

Also confirmed Sunday April 26 at 2300 on WRMI 9395, S9+30 into Georgia SDR but with dropouts presumably receiver problem; and OK into Knoxville.

Also confirmed Sunday April 26 at 2330 on WRMI 9455, S9+10/25 into Knoxville SDR.

Also confirmed UT Monday April 27 at 0030 on WRMI 7780, S9/+10 into S Texas SDR.

Also confirmed UT Monday April 27 from 0301.7 on Area 51 webcast only. As often, JL was still yakking at 0300 sharp when WBCQ 5130 autocuts to s/off. Next:

Missed checking UT Tue Apr 28 at 0330 on WRMI 7780; anyone hear it?

Not confirmed Tue Apr 28 at 1303-1313+ on WRMI 9955, instead S5/S7 of dead air direct! 9395 and with Encore 15770 are audibly modulating.

Not confirmed Tue Apr 28 at 1405, 1414, 1430+ still dead air! But with splash from 9930 WTWW. Hope WOR at least on WRMI stream, not checked until after 1500 when heard with something else.

Confirmed Tuesday April 28 at 2330 on SW Radio Gold, Germany, 3975.002-, S9+5 into UTwente.

Also confirmed UT Wednesday April 29 at 0030 on WRMI 9395, S9+30 into Georgia SDR.

Also confirmed Wednesday April 29 from 1930.7 on SW Radio Gold, Germany, 6160.000+ S9+35 and 3975.001+ S9/+10 into UTwente.

Also confirmed Wednesday April 29 at 2100 on WBCQ 7490-, S6/S7 into Georgia SDR, some gospelhuxter, TOMBS? chopped off at 2059 for promo and ID, then WOR. Certainly not `Pirate Joe Extravaganzo` who has been gone from Wed 20-21 UT for months, but still on the websked!

Also confirmed Wednesday April 29 at 2330 on WRMI 9395, S9+10/30 into Georgia SDR, after a bit of `Hard Day`s Night` at 2329. Next:

0130 UT Thursday WRMI 5010 to S {canceled? no longer on websked};

** U S A. 7490 -111 Hz = 7488.989 into NH SDR, UT Sat Apr 25 at 0000, WBCQ opening `AAAWWW` with `WTO`, and talkovers ``OK, Folx, before AI takes over the world and our minds...``, and datestamp 13 Feb YOOLF 2026 right away, i.e. same as last heard March 7, after repeating every week in Feb! Never mind. Quick check found *no* other WBCQ frequencies on air now (Glenn Hauser, OK, WOR)

** U S A. 9955, Apr 28 at 2203, this WRMI is OFF, while 8 and 9 hours earlier it was merely dead air, but now, no air. Still audible on 9395, 15770, 17790. Nothing about this on WRMI FB, where anomalies are sometimes explained, rather than on own website! (Glenn Hauser, OK, WOR)

** U S A. 15770, Apr 29 at 1545, WRMI with lugubrious Korean talk, artificially slowed down, certainly not `Truth 2 Ponder` as on skedgrid this hour for System F. S9+10/20 into Maryland SDR, and not // 9395, JBA 7730 or 9955 off. Might be multilingual SMTV, but not their format to go on and on like this; mentioning `Maria` a few times so maybe an RCC gospel huxter? 1557 suddenly speeds up to normal pace, but quick cut to music; 1559 ID, 1600 four tones and `Hello World Radio` as sked, a DJ show mostly music (Glenn Hauser, OK, WOR)

** U S A. 5920, April 24 at 0600, S9+40/35 of dead air from WTWW instead of TOMBS; unknown for how long (Glenn Hauser, OK, WOR)

** U S A. 5920, Apr 25 at 0653, S9+25 of dead air again for at least a minute and probably much longer from WTWW TOMBS (Glenn Hauser, OK, WOR)

** U S A. 9930, Apr 29 at 1441, dead air from TOMBS on WTWW, only S9 direct; by next check 1515 is modulating (Glenn Hauser, OK, WOR)

** U S A. 9750/9965, Apr 29 at 2209, approx. range of WTWW splatter out of 9930 which is distorted and overmodulated with TOMBS, S9+50 direct. Some QRM to 9955 WRMI, but worst roughly between 9800 and 9950 (Glenn Hauser, OK, WOR)

** U S A. 4840, April 23 at 0633, WWCR-3 is OFF. At 1608, 13845 is on but JBA into PEI SDR (Glenn Hauser, OK, WOR)

** U S A. 760, Apr 29 at 0643 UT, WJR Detroit has QRM from another talk station, almost equal strength, and religious. Just about has to be, by format, proximity, direxionality, KCCV Overland Park KS, but site across in MO; 200 watt night pattern favors WSW with null toward WJR; 6000 watt day pattern NE/SW, Enid barely within fringe contour. Guess which? No doubt the Deity makes an exception (Glenn Hauser, OK, WOR)

** U S A. 1420 kHz, Apr 28 at 0630 UT, mentions 98.7 in English. This time my first search is in the WTFDA FM DB for 98.7s relaying any 1420. Three hits: K254CI of KWBF Lubbock TX; K254FT of KTOE Mankato MN; K254DK of KUJ Walla2 WA. Surely KWBF or KTOE. Then, NRC AM Log: 98.7 not shown for KTOE or KWBF, but for KUJ - but that`s least likely due to distance. Has KWBF on 98.3 instead but call still as K254CI, i.e. error; this seems familiar, may have gone thru this before. KWBF is U1 500/140, REL; KTOE is U2 5000/5000, TLK/OLD format. Night pattern major lobe to SW thisaway so I`ll go with KTOE! Was also hearing C2CAM on 1420 just before this, and KTOE is an affiliate of that (Glenn Hauser, OK, WOR)

** VATICAN. 9710, UT Mon Apr 27 at 0438, S9/S7 of classical music, then 0439 VR IS, 0440, ``LIX`` and opening Slavic language, Ukrainian registered daily in HFCC at 50 degrees, so ought to be less audible way over here. No sign of RHC which was active on 9710 last night. LIX = catchphrase ``Laudetur Iesus Christus`` maybe further condensed to ``59`` (Glenn Hauser, OK, WOR)

** VENEZUELA. 4940, Apr 28 at 0652, Estación 4940 is off again (Glenn Hauser, OK, WOR)

** VENEZUELA. 4940, Apr 29 at 0657, Estación 4940 is on the air S8, unlike last night (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 620 kHz, April 26 at 0617 UT, Mexmx and something in Spanish. Now more of a DXable frequency since the demise of KTNO Plano TX, ex-KWFT hijacked from Wichita Falls into The Metroplex. NRC AM Log shows no other Spanish on 620, unless on a couple of unlikely ETH brokereds. IRCA Mexican log shows four, not all of which confirmed active, led by XENK CDMX 50/5 kW (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 810.53, Apr 27 at 0642 UT, JBA carrier hetting 810 WHB. Still nothing so far upoff in mwoffsets (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1440.03 approx., Apr 27 at 0628 UT, JBA carrier making LAH against 1440 signals. MWoffsets shows Peru on 1440.0189, Brasil on 1440.04, but a USA on 1440.067 altho wide-ranging 1439.7110 to 1440.678: WKLV Blackstone VA as of 2025-06-03 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9936.0, Apr 27 at 0618, another mystery open carrier ending in -6, S7 accompanied by JBA clix at the rate of once per trisecond, out to approx. +/- 12 kHz (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 15000, Apr 28 at 2206, huge wideband noise blob almost obliterating WWV, its tone JBA; on two different antennas, but maybe something local, not usually a problem on this frequency (Glenn Hauser, OK, WOR)
